

How Access Control Can Help Your Budget

Presented by: Mike Rothstein

What is Access Control?

A system which enables you to control access to areas in a physical facility.

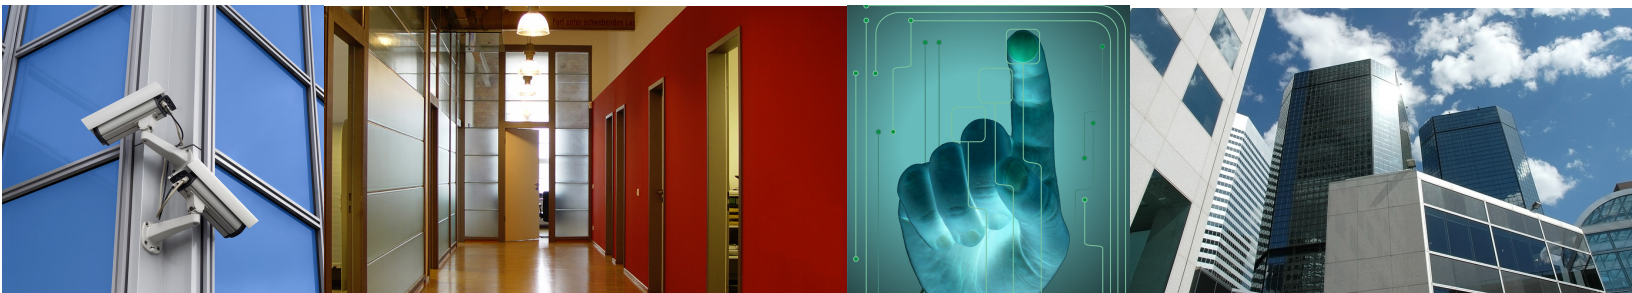

It is the practice of restricting entrance to a property, a building, or a room to authorized persons.

- Limit access to perimeter doors
- Trigger alarms when doors are accessed without permission.
- Trigger surveillance systems on alarms
- Time and attendance
- Biometric inputs
- Parking management
- Intruder detection
- Elevator control
- Some systems are capable of up to 100,000 points of access
- Input applications
- Ability to enter graphic floor plans
- Ability to set guard tours
- Gives real time diagnostic and event recordings
- Integrated photo badging
- Ability to network multiple sites anywhere in the world.
- Ability to add Muster tracking
- Integrated lockdown features– selected readers, workstations.

How it can save you \$\$

- ◆ Provides ala-cart features– Start with a basic system and features as needed
- ◆ Some systems have the ability to integrate with HR Software
- ◆ Be able to identify "shrinkage"- Employee theft, employee pilfering
- ◆ Some insurance companies give discounts for integrated systems
- ◆ Protects computer servers
- ◆ Sarbanes-Oxley Act
- ◆ Ability to lock and unlock doors for set business hours
- ◆ Lockdown features- Seconds vs. minutes
- ◆ One person can lockdown entire facility vs. several staff members (crisis situation)
- ◆ Parking management and elevator control– all accomplished without adding more staff
- ◆ Networking multiple sites/doors
- ◆ Serves as a crime deterrent

This is the future, so plan ahead
